Pre-Purchase Inspection Checklist: 2021 Winnebago Micro Minnie 1708FB

Inspection Date: _____ **Location:** _____ **Seller:** _____

VIN: _____ **Asking Price:** $_____
Mileage/Hours: _____

EXTERIOR INSPECTION

Fiberglass Body and Structure

- [ ] Check entire exterior for delamination (bulges/bubbles)
- [ ] Inspect all seams and joints for proper caulking
- [ ] Examine for cracks, dents, or stress fractures
- [ ] Look for paint fading or discoloration
- [ ] Check corners and edges for separation
- [ ] **CRITICAL:** Check for any signs of roof leaks (common issue)

Roof System ⚠ HIGH PRIORITY

- [ ] Inspect entire roof membrane for cracks, tears, or punctures
- [ ] Check all roof penetrations (vents, AC, antenna) for proper sealing
- [ ] Verify condition of roof-mounted AC unit
- [ ] Look for soft spots or sponginess (water intrusion)
- [ ] Check rubber roof material condition
- [ ] Inspect roof ladder mounting points
- [ ] **Notes/Issues:** _____

Windows and Doors

- [ ] Test all windows open/close smoothly
- [ ] Check all window seals and weatherstripping
- [ ] Verify window latches and locks function
- [ ] Note: Windows are single-pane (less insulation)
- [ ] **Check bedroom window crank** (prone to failure)
- [ ] Verify entry door seal is intact
- [ ] Test door locks, latches, and deadbolt
- [ ] Check door alignment
- [ ] Inspect screen door and latch

Tires and Wheels

- [ ] Tire 1 DOT date: _____ Condition: _____
- [ ] Tire 2 DOT date: _____ Condition: _____
- [ ] Check for uneven wear, dry rot, sidewall cracks
- [ ] Verify tire pressure: L: ____ psi R: ____ psi
- [ ] Check tread depth (min 4/32")
- [ ] Inspect wheel bearings for play
- [ ] Check lug nuts for proper torque
- [ ] Examine brakes and pads
- [ ] Test electric brake connection

Frame and Undercarriage

- [ ] Inspect frame rails for rust or corrosion
- [ ] Check axles for alignment and damage
- [ ] Examine suspension components
- [ ] Check hitch and tongue area structure
- [ ] Test all four stabilizer jacks
- [ ] Test electric tongue jack operation
- [ ] Check battery box mounting
- [ ] Inspect underbelly liner for holes or tears
- [ ] Verify all mounting hardware secure
- [ ] **Notes/Issues:** _____

Hitch and Towing Components

- [ ] Inspect hitch coupler (2-5/16" ball)
- [ ] Test coupler latch mechanism
- [ ] Check safety chains and mounting points
- [ ] Test breakaway switch and cable
- [ ] Test brake lights
- [ ] Test turn signals (left and right)
- [ ] Test running lights
- [ ] Test reverse lights
- [ ] Test 7-pin connector with tow vehicle

Awning System

- [ ] Fully extend awning - operates smoothly
- [ ] Check fabric for tears, mildew, fading
- [ ] Test LED lighting in awning
- [ ] Test awning motor and controller
- [ ] **Check awning wiring cover** (prone to falling off)
- [ ] Verify mounting hardware secure
- [ ] Check arms extend and lock properly
- [ ] Test wind sensor if equipped

Storage Compartments

- [ ] Open and test all exterior compartment latches
- [ ] Check for water stains or rust inside
- [ ] Verify doors seal properly
- [ ] Check hinges and gas struts
- [ ] Check propane compartment ventilation
- [ ] Test outdoor shower hose
- [ ] Check dump valve access

INTERIOR INSPECTION

Water Damage ⚠ HIGH PRIORITY

- [ ] **CRITICAL:** Inspect entire ceiling for stains/soft spots
- [ ] Check walls around all windows for moisture
- [ ] **CRITICAL:** Press floor throughout - check for soft spots

- [ ] Look under dinette for sawdust (moisture damage)
- [ ] Look under bed for sawdust
- [ ] Check all corners and seams for separation
- [ ] Check cabinetry for water damage or swelling
- [ ] Check walls for proper attachment
- [ ] Moisture meter reading (if available): _____
- [ ] **Notes/Issues:** _____

Plumbing System

- [ ] **Check under kitchen sink - plumbing connections** (common factory defect)
- [ ] **Check under bathroom sink - plumbing connections**
- [ ] Look for sawdust around sink plumbing
- [ ] Test kitchen sink faucet hot and cold
- [ ] **Check kitchen faucet nozzle** (prone to breakage)
- [ ] Test bathroom sink faucet hot and cold
- [ ] **Check bathroom hot water knob** (plastic, prone to breaking)
- [ ] **Test shower on/off valve** (common failure point)
- [ ] Turn on water pump - listen for proper operation
- [ ] Check for leaks while pump running
- [ ] Verify pump cycles and builds pressure
- [ ] Test city water connection
- [ ] Test outdoor shower
- [ ] Test toilet flush mechanism
- [ ] **Check toilet hoses** (proper length, not bent/kinked)
- [ ] **Notes/Issues:** _____

Water Heater System

- [ ] Access panel under bathroom sink
- [ ] **Check wiring connections secure** (often loose from factory)
- [ ] **Test main inlet valve** (common failure)
- [ ] Test electric mode (120V) - heats properly
- [ ] Test propane mode - ignites and heats
- [ ] Check water temperature reaches 120-140°F
- [ ] Check for leaks around tank and connections
- [ ] Check relief valve condition
- [ ] Test bypass valve operation
- [ ] **Notes/Issues:** _____

Tank Systems

- [ ] **Test black tank valve** (known to bind/fail)
- [ ] Test gray tank valve
- [ ] Check protective liner underneath
- [ ] Test tank sensors (if equipped)
- [ ] Check dump hose condition
- [ ] Check tank vent pipes on roof
- [ ] Look for leaks or staining around tanks

Kitchen Appliances

- [ ] **Test refrigerator on electric mode** (common cooling issues)
- [ ] **Test refrigerator on propane mode**
- [ ] Wait 2-4 hours - check temperature: _____°F
- [ ] Check refrigerator door seals and latches
- [ ] Check freezer cools adequately
- [ ] Test stove burner 1 on propane
- [ ] Test stove burner 2 on propane
- [ ] Test stove burner 3 on propane
- [ ] **Check propane regulator** (consistent flame)
- [ ] Test oven operation and temperature
- [ ] **Test oven vent fan** (fan blade secure on spindle)
- [ ] Test microwave/convection oven
- [ ] **Check microwave door latch** (opens while driving issue)
- [ ] Test range hood fan and light
- [ ] Test all kitchen cabinet/drawer mechanisms
- [ ] **Notes/Issues:** _____

Climate Control

- [ ] **Test furnace on propane** (inconsistency issues reported)
- [ ] Verify furnace ignites reliably
- [ ] Check airflow from all vents
- [ ] Run AC unit - verify cooling (13,500 BTU)
- [ ] Let AC run 15-20 min - temp drop: _____°F
- [ ] Listen for unusual AC noises
- [ ] Test all roof vents open/close
- [ ] Test fantastic fan (if equipped)
- [ ] Check all vent screens intact

Electrical System

- [ ] **Test ALL outlets with circuit tester** (common power issues)
  - [ ] Kitchen outlets: _____
  - [ ] Bathroom outlets: _____
  - [ ] Bedroom outlets: _____
  - [ ] Living area outlets: _____
- [ ] Test converter/charger operation
- [ ] Test GFCI outlets and reset buttons
- [ ] **Test all interior lights** (LED flickering common)
- [ ] **Test bathroom light specifically** (frequent flickering)
- [ ] Verify 12V system functions
- [ ] Verify 120V system functions
- [ ] Test battery charging with multimeter: _____ V
- [ ] Check battery condition and connections
- [ ] Check breaker panel - no tripped breakers
- [ ] Check for burnt wires or electrical smells
- [ ] Test USB charging ports
- [ ] Test all switches and dimmers
- [ ] **Notes/Issues:** _____

Propane System

- [ ] **Test propane regulator at stove** (pressure consistent)
- [ ] **Check automatic changeover valve**
- [ ] **Inspect propane hoses** (not too short or aggressively bent)
- [ ] Test propane detector alarm
- [ ] Check for propane smell
- [ ] Test stove on propane ✓
- [ ] Test oven on propane ✓
- [ ] Test water heater on propane ✓
- [ ] Test furnace on propane ✓
- [ ] Check propane tank mounting
- [ ] Check propane compartment ventilation
- [ ] Propane tank 1 cert date: _____
- [ ] Propane tank 2 cert date: _____

Interior Features

- [ ] Test dinette table mechanisms
- [ ] Check cushion condition
- [ ] Open all cabinets - smooth operation
- [ ] Open all drawers - smooth operation
- [ ] **Check pull-down shade holders** (especially dinette - prone to loosening)
- [ ] Check window treatment mounting
- [ ] Test all cabinet latches
- [ ] Test bedroom vent fan
- [ ] Test TV mounting and connections
- [ ] Test AV system (AM/FM/CD/DVD/USB/Bluetooth)
- [ ] Inspect flooring for damage or stains
- [ ] Check upholstery for tears or stains

SYSTEMS TESTING (WITH POWER)

Full Electrical Test

- [ ] Connect to 30-amp shore power
- [ ] Run AC + microwave + water heater simultaneously
- [ ] No breakers trip under load
- [ ] Check voltage at outlets: _____ V (should be 110-120V)
- [ ] Check converter output: _____ V (should be 13.2-13.8V)
- [ ] All systems maintain power

Full Water Test

- [ ] Connect to city water with pressure regulator
- [ ] Turn on all faucets - consistent pressure
- [ ] Water heater heats on electric
- [ ] Fill fresh water tank - test pump
- [ ] Run all fixtures simultaneously
- [ ] Check for any leaks throughout test

Full Propane Test

- [ ] Open propane tanks
- [ ] Test automatic changeover
- [ ] Run all propane appliances together
- [ ] No gas smell or hissing
- [ ] Propane detector stays quiet

DOCUMENTATION REVIEW

- [ ] Request maintenance records
- [ ] Check warranty status (1-year limited from purchase date)
- [ ] Verify clean title - no liens/salvage
- [ ] VIN recall check: _____
- [ ] Ask about winterization history
- [ ] Get list of modifications/repairs
- [ ] Obtain owner's manual and appliance manuals
- [ ] Review previous inspection reports (if any)

Questions for Seller

- [ ] Has trailer ever leaked? Where? Repairs done?
- [ ] Any warranty claims or repairs?
- [ ] Storage method (covered/uncovered/climate-controlled)?
- [ ] Maintenance performed (roof seal, bearings, etc.)?
- [ ] Any known issues or concerns?
- [ ] Reason for selling?
- [ ] What's included (hoses, accessories)?
- [ ] **Seller responses: _____**

RED FLAGS ⚠ DEALBREAKERS

Mark if found - consider walking away:

- [ ] **Multiple roof leak locations**
- [ ] **Plumbing with wrong fittings**
- [ ] **Excessive sawdust under sinks**
- [ ] **Black tank valve binding**
- [ ] **Water heater not heating**
- [ ] **Multiple appliance failures**

- [ ] **Many broken plastic components**
- [ ] **Severe LED flickering throughout**
- [ ] **Improperly routed propane hoses**

INSPECTION SUMMARY

Overall Condition: ☐ Excellent ☐ Good ☐ Fair ☐ Poor

Major Issues Found:

_____
_____
_____

Minor Issues Found:

_____
_____
_____

Estimated Repair Costs: $_____

Recommended Action:
☐ Purchase as-is at asking price
☐ Negotiate price reduction of: $_____
☐ Request seller complete repairs before purchase
☐ Walk away - too many issues

Decision: ☐ PROCEED ☐ NEGOTIATE ☐ WALK AWAY

TOOLS NEEDED FOR INSPECTION

- [ ] Flashlight (bright LED)
- [ ] Multimeter or circuit tester
- [ ] Moisture meter (optional)
- [ ] Ladder for roof access
- [ ] Creeper or towel for undercarriage
- [ ] Camera/smartphone for photos
- [ ] This printed checklist
- [ ] Tire pressure gauge
- [ ] Level
- [ ] Gloves and knee pads

Inspector Name: _____ **Signature:** _____

Notes:

REFERENCE INFORMATION

Trailer Specifications (2021 Winnebago Micro Minnie 1708FB):

- Length: 19'4.5" | Width: 7'0" | Height: 10'5" (with AC)
- GVWR: 5,000 lbs | Dry weight: 3,360 lbs | Hitch weight: 340 lbs
- Fresh: 31 gal | Gray: 25 gal | Black: 25 gal | Propane: 40 lbs
- AC: 13,500 BTU | Furnace: 18,000 BTU | Refrigerator: 10.3 cu ft
- Electrical: 30-amp | Water heater: 6 gallons

Professional Inspection: Consider hiring NRVIA-certified inspector ($300-500)

Estimated Post-Purchase Costs:

- Tires (if 5-7+ years old): $400-600
- Preventative roof resealing: $200-400 (DIY) or $500-1,000 (pro)
- Bearing inspection/repacking: $150-300
- Propane system check: $75-150
- Battery replacement: $100-200
